

ORACLE CORPORATION

- US\$26.8 billion total GAAP revenue in FY10
- 370,000 customers worldwide
- 295,000 Oracle Database customers
- 105,000 Oracle Fusion Middleware customers
- 65,000 Oracle Applications customers
- More than 250,000 midsize customers
- More than 20,000 partners worldwide
- More than 104,500 employees, including
 - 29,000 developers and engineers
 - 15,500 support personnel
 - 20,000 consulting experts
- 10 million developers—the largest developer community worldwide

Complete, Open, Integrated Software and Hardware Systems

With more than 370,000 customers—including 100 of the Fortune 100, and representing a variety of industries in more than 145 countries around the globe—Oracle provides the world's most complete, open, and integrated business software and hardware systems.

Oracle has always developed technologies that customers use to manage information, streamline business processes, and reduce the costs and complexity of managing their IT infrastructures. Starting with Oracle's flagship database software, followed by packaged enterprise applications and middleware, Oracle provides its customers with a more complete, open, and integrated software solution. Now, with the addition of Sun's servers, storage, SPARC, and software technologies such as Solaris, MySQL, and Java, Oracle's portfolio has evolved. Oracle is engineering open and integrated systems—from applications to disk—where all the pieces fit and work together out of the box, delivering

- Reduced complexity of buying, implementing, and managing systems
- Superior performance, manageability, and cost savings
- The most scalable, reliable, and secure systems
- Lower systems integration and management costs

In addition to offering complete systems to its customers, Oracle builds leading hardware and software system components using technologies based on open standards—giving customers a choice. Customers can choose the complete system, or have the option to procure and integrate leading software and hardware components from Oracle to meet their specific needs.

Oracle Database

Oracle Database—the world's first commercial relational database, as well

as the first relational database for grid computing—helps ensure that enterprise information is always available and secure. Oracle is the most reliable choice for large enterprises, midsize businesses, and departments alike. Oracle provides the

- #1 database
- #1 data warehouse
- #1 database on Linux
- #1 embedded database

Oracle has added the world's most popular open source database, MySQL, to Oracle's existing database products (a line that includes the open source database, Oracle Berkeley DB). Oracle also offers InnoDB, the leading transactional storage engine for the MySQL database.

Oracle Fusion Middleware

Oracle Fusion Middleware consolidates Oracle's leading, standards-based software to deliver "hot-pluggable" middleware with a comprehensive, seamlessly integrated, service-oriented-architecture software infrastructure.

Oracle Applications

More than 65,000 customers worldwide rely on Oracle's complete, open, and integrated enterprise applications to achieve superior results. Oracle provides a secure path for customers to benefit from the latest advances that improve the customer software experience and drive better business performance.

Oracle Industry Solutions

Oracle industry solutions address the specific challenges and processes unique to your industry. Globally, Oracle is #1

ORACLE OFFERINGS

- Oracle Database
- Oracle Fusion Middleware
- Oracle Applications
- Oracle Industry Solutions
- Oracle Accelerate Solutions
- Sun Servers
- Sun Storage
- Java
- Oracle Services

INDUSTRY DEPTH

Oracle customers include

- 20 of the top 20 retailers
- 20 of the top 20 insurance companies
- 20 of the top 20 pharmaceutical companies
- 20 of the top 20 automotive manufacturers
- 10 of the top 10 automotive suppliers
- 10 of the top 10 communication companies run Sun SPARC servers with Oracle Solaris
- 10 of the top 10 banks run Sun SPARC servers with Oracle Solaris

ORACLE LEADERSHIP

- #1 UNIX server
- #1 tape storage
- #1 database
- #1 database on Oracle Solaris
- #1 database on Linux
- #1 embedded database
- #1 development language: Java
- #1 data warehouse
- #1 middleware
- #1 customer relationship management
- #1 human capital management
- #1 enterprise performance management
- #1 in banking
- #1 in communications
- #1 in financial services
- #1 in public sector
- #1 in professional services
- #1 in retail

in banking, communications, financial services, life sciences, professional services, public sector, and retail.

Oracle Accelerate Solutions

Oracle Accelerate helps midsize companies achieve high growth by providing comprehensive, integrated solutions that are industry-focused for rapid deployment, best practices, and a custom fit. They are packaged, priced, and delivered to be easy to own, implement, and maintain.

Sun Servers

Sun servers provide the performance, scalability, and cost-effectiveness that meet your requirements in technical computing, virtualization, and eco- and energy-efficient design. With the complete family of Sun servers from Oracle—Sun Blade servers; Sun Netra servers; and entry-level, midrange, and high-end servers—a flexible IT ecosystem is a reality. Oracle software runs faster on Sun SPARC/Oracle Solaris systems than on any other platform.

Sun Storage

Oracle's Sun end-to-end storage solution includes advanced software and hardware, integration of Flash technology, and leading expertise in long-term information management and retention—as well as a fully unified storage and disk portfolio. With the acquisition of Sun, Oracle provides the #1 tape storage products.

Communities

Oracle has been a leader in the Java community since the inception of the Java programming language, and has made the world's largest investment in the Java platform—the foundation for Oracle Fusion Middleware products and Oracle's next-generation enterprise applications. Oracle plans to accelerate investment in the Java platform for the benefit of customers and the Java community. With the acquisition

of Sun, Oracle is now responsible for stewardship of the largest developer community in the world and the #1 developer language.

Oracle Services

Oracle services help companies get the most from their technology investments and span the full solution lifecycle.

- Oracle Support offers comprehensive maintenance and problem resolution for the complete stack, from applications to disk. My Oracle Support, Oracle's integrated, next-generation support platform, provides personalized, proactive support capabilities for all Oracle systems and components.
- Oracle On Demand delivers the world's leading software and hardware to end users and manages IT infrastructure, software, security, service levels, and IT governance—allowing you to focus on your core business.
- Oracle University delivers flexible, quality instruction with a commitment to customer satisfaction—offering hundreds of courses that cover virtually all of Oracle's products.
- Oracle Consulting assembles, optimizes, and manages the complete, integrated business systems that put your business data to work.

Get Better Results with Oracle

Oracle has expanded its leadership in enterprise software to include the complete hardware systems on which customers deploy their software, using its expertise and products to address a much broader array of customer problems. The comprehensiveness and strength of Oracle's products and services have been developed using input from thousands of valued advisory board and Oracle user group customers. Oracle is committed to helping customers get the most out of their enterprise software and hardware investments.

Oracle is committed to developing practices and products that help protect the environment
